RE: Docket No. 98N-1265

Gentlemen:

In its present form, the MOU, as well as the Compounding Section 503A of the Modernization Act, severely restricts the rights of physicians and patients to obtain healthcare products from the provider of their choice, and infringes on the rights of compounding pharmacists to serve the public's medical needs.

Compounded drugs/natural medications are safer solutions for individuals, like myself, who have difficulty with or toxic reactions to patented (noncompounded) drugs. With the MOU, the FDA would restrict these options if the drug is not compounded in our state.

More and more, I'm seeing the United States we live in becoming a dictatorship! The citizens of this country have a God-given right to choose which doctor they have, what they will allow in their treatment, and what medications or natural products they will use, as well as where they will get them!!! The Food and Drug Administration is certainly no friend of the people--not to ordinary citizens, not to doctors, and not to pharmacists. You are an arrogant, power-hungry entity who is hand-in-glove with the outrageously greedy drug company CEO's.

I see no evidence that you look out for the welfare of "the people." You try to force them to take drugs with serious/often fatal side effects. Most of us out here are a whole lot smarter than you figured--we see you for what you really are!!!

Personally, I don't need you to tell me whether or not I can choose a more natural, safer product than your almighty drugs. Why don't you leave the U.S. and set up shop in Russia. See if they want to tolerate you!!!

Most sincerely,

C. J. Miller
Lansing, Michigan
